## Can you use the TalkSocket without your phone?

TalkGo Customer Service - 2023-03-27 - Comments (0) - FAQs

The TalkSocket needs to be paired with your phone via Bluetooth. As long as the TalkSocket is within Bluetooth range (30 ft) the TalkSocket will work. Remember, the TalkSocket does not have a built-in speaker which means whatever audio output you are connected to is where you will hear your request come from (phone, vehicle, speaker, headphones).
